

~~SECRET~~

2/10L

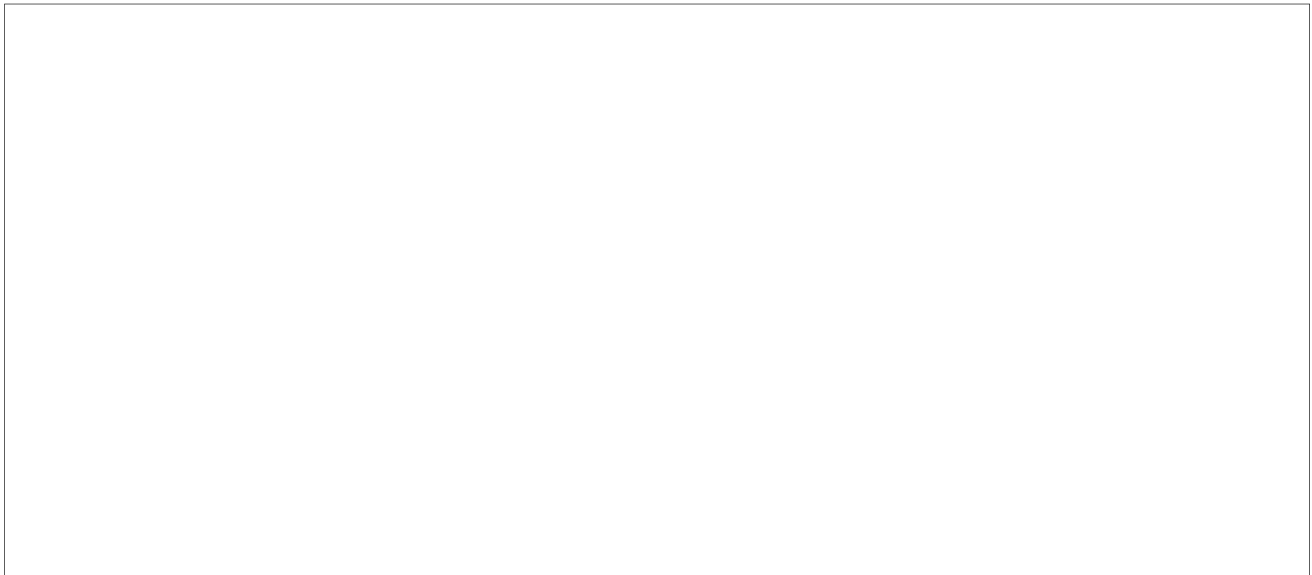

DDA 87-0218

6 February 1987

MEMORANDUM FOR: Acting Director of Central Intelligence

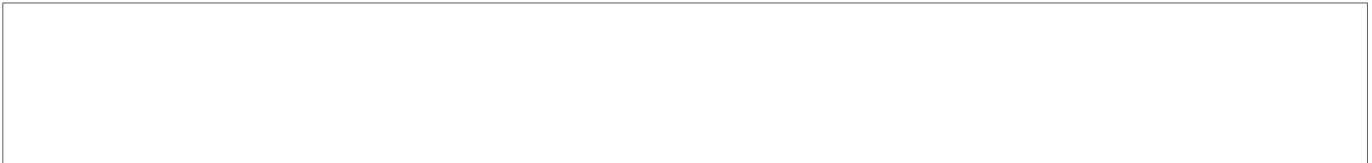

FROM: William F. Donnelly
Deputy Director for Administration

SUBJECT: Weekly Report for Period Ending 6 February 1987

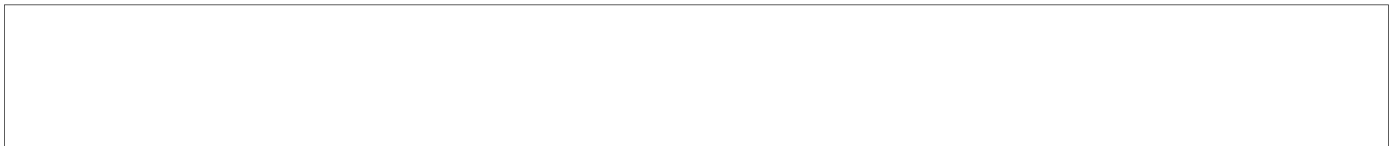

25X1

4. The Office of Information Technology (OIT) PC Software Center completed its first quarter of operation on 5 February. Since its opening, the Center has distributed over 550 software packages valued in excess of \$124,000. Customers can now get software months sooner than they could previously. The Directorate of Intelligence, purchasing 64 percent of the packages, has been the biggest customer.

25X1

ALL PORTIONS SECRET

25X1

SECRET

6. OIT personnel are working with AIRPHONE, Inc., on the feasibility of installing the AIRPHONE telephone system on the DCI's aircraft. The use of a XY-40 secure voice unit with this system would provide the DCI with secure voice communications with Headquarters and other senior government officials.

7. Office of Security managers recently met with a member of the FBI to offer guidance pertaining to the initiation of an FBI Industrial Security Program.

8. On 3 February OL and General Accounting Office (GAO) representatives met to discuss the Agency's experience in changing from a GSA-supported facility to a contractor-supported facility. GAO is currently negotiating with GSA to take over operation and maintenance responsibility for their building.

25X1

11. In February 1987 the Office of Training and Education (OTE) has scheduled 35 conferences/courses [redacted] with a projected enrollment of [redacted] persons.

25X1

13. OTE's Secretarial Training Branch will sponsor a series of seminars in the Headquarters Auditorium during National Secretaries Week. Participants will get elective credit for those they attend. Information about the seminar topics and meetings will be distributed in March.

14. The Office of Personnel (OP) completed initial processing for [redacted] applicants for our pilot Career Trainee Summer Program. We expect to meet our goal of 30 candidates for the first running of the program.

25X1

15. On 2 February 1987 the OMS made AIDS testing a standard part of the medical examination process for Agency applicants, employees and dependents.

16. The OMS exercise physiologist departed for a two-week TDY [redacted] to present a course in physical therapy to field hospital personnel working with disabled patients. This is the first of a series of four training TDYs that will significantly upgrade the capabilities of the field hospital.

25X1

17. The budget formulation and reporting segment of the Budget and Accounting Resources System (BARS), jointly developed by the Office of Finance and OIT, is scheduled for operation on 23 February 1987. This is the first major system utilizing the Cullinet Integrated Database Management System (IDMS) as part of the corporate development program.

18. There was an overwhelming response to OP's retirement benefits comparison software demonstration conducted in Headquarters from 3 - 5 February. Approximately [redacted] employees stopped by the demonstration of the Federal Employees Retirement System (FERS). OP representatives provided personal benefits comparison demonstrations to approximately [redacted] of those employees. Additional demonstrations are scheduled for employees in outlying buildings.

25X1

PROCUREMENT MANAGEMENT STAFF, OL
WEEKLY REPORT
Period Ending on 3 February 1987

1. Status of Tasks Assigned by Senior Management:

No tasks pending.

2. Major Events That Have Occurred During the Preceding Week:

a. CONIF Activity:

CONIF input 149 contracts and 87 amendments during this past week.

b. Training:

(1) The in-house training course, Management of Defense Acquisition Contracts (Basic), is complete and all students have returned to their components. Procurement Management Staff (OL/PMS) is now reviewing other courses in order to evaluate whether or not they can be given by qualified accredited instructors at our facilities. The courses under consideration at this time are Negotiation Techniques and Cost and Price Analysis.

(2) Preparation and coordination continue on several other Agency courses -- Logistics Support Program and Introduction and Overview of Procurement in CIA. 25X1

(3) [] gave the FOCI briefing [] 25X1
[] on 29 January as part of the Contract Process 25X1
Course.

c. Procurement Management Review (PMR):

[] (Commercial Systems and 25X1
Audit Division, OF) initiated the PMR of the DDI Contract Team on
2 February.

d. Agency Contract Review Board (ACRB)

Eleven ACRB dockets were reviewed and questions prepared by
OL/PMS for the 3 February meeting.

[] 25X1

C O N F I D E N T I A L

SUBJECT: OL/PMS Weekly Report for the Period Ending 3 February 1987

e. Meetings:

(1) [] met with personnel from the Defense Systems Management College, Fort Belvoir, and obtained a comprehensive list of software being developed for application to program management and procurement. OL/PMS acquired, free of charge, three software programs -- Contract Appraisal System (CAPPS), Competition Evaluation Model, and Software Cost Estimating Module. Mr. Snoderly, Associate Dean of the Department of Automated Resources and Education, School of Acquisition Education, has indicated a willingness to work closely with the Agency. [] plans to meet with Mr. Snoderly and his computer application chiefs in about two weeks. While there [] acquired several publications relevant to acquisition planning and procurement management. 25X1

(2) A meeting with [] of the Information and Management Support Staff, OL, was held to discuss their participation in a government property symposium to be conducted in February on the Automated Inventory Management System (AIMS) presently in use by the U.S. Air Force, Special Projects, Property Management Office. Mr. Lewis Brauthwaite of that office has been contacted to provide a 4-hour briefing to Agency personnel. Details of the briefing are still being coordinated. 25X1

f. Government Travel Requests:

A policy paper on the use of government travel requests (GTR's) by contractors was drafted for inclusion within the Agency Contracting Manual.

g. Procurement Note (PN) 185

Distribution of PN 185, Hazardous Chemicals, was made on 3 February 1987.

3. Upcoming Events:

Bimonthly Team Chief Meeting

The meeting is scheduled for 27 February 1987. (See the OL/PMS weekly report for the week of 27 January 1987.)

4. Management Activities and Concerns:

Personnel Assignment:

No confirmed date has been provided for [] arrival in OL/PMS. 25X1

C O N F I D E N T I A L

MISS

25X1

PRINTING AND PHOTOGRAPHY DIVISION
WEEKLY REPORT FOR PERIOD OF
28 January 1987 - 04 February 1987

I. Status of Tasks Assigned by Senior Management:

None.

II. Items or Events of Major Interest that have Occurred
During the Preceding Week

A. The production of the 13 volume Congressional Budget Justification Books (CBBJ) continues as a high priority task for the Office of Logistics, Printing and Photography Division (OL/P&PD). As of 2 February, Volumes 6, 8, 10, 11, and 13 have been completed and disseminated. All other volumes are in the production cycle with the exception of Volume 5 which is awaiting OK of page proofs. The processing of the CBBJ has been hindered this year due to the slow verification process by the customer. [REDACTED]

25X1

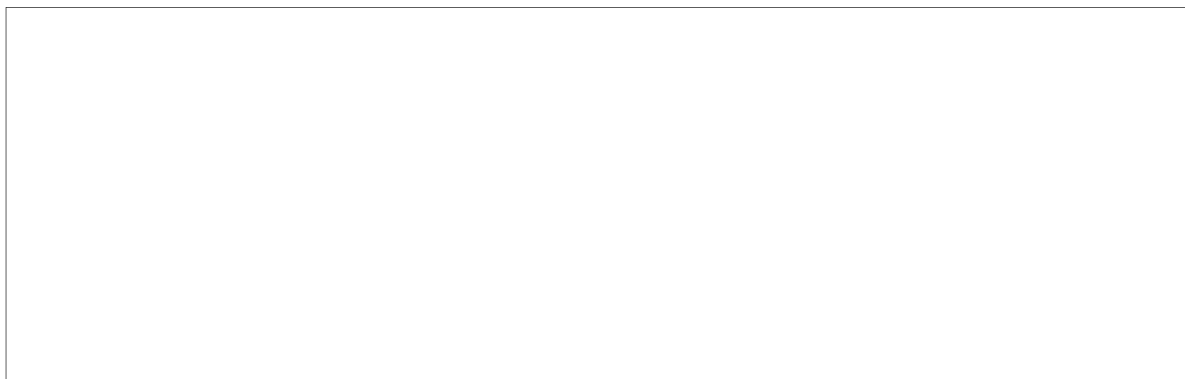

B. Representatives of the Office of Logistics, Printing and Photography Division (OL/P&PD) met with representatives of the Office of Finance (OF) and the Office of Information Technology (OIT) on 29 January to discuss a change to OF's Master Leave Payroll program. This change requires P&PD to change the Master Leave form slide which is used as an overlay on the Computer Output Microfiche recorder when producing the Master Leave job. P&PD has contracted with Photographic Sciences Corporation (PSC) to modify the existing form slide, and a proof of the new form slide was reviewed at this meeting. It is anticipated that further program changes will be requested by OF. [REDACTED]

25X1

25X1

C O N F I D E N T I A L

25X1

The Agency Micrographics Officer (AMO) from the Office of Information Services (OIS) is in the process of conducting a biannual source document microfilm survey in the OL/P&PD. This survey, which is expected to be completed in two weeks, will examine personnel, production, equipment, and job throughput time. [REDACTED]

25X1

25X1

D. The Office of Logistics, Printing and Photography Division (OL/P&PD) completed the replication of [REDACTED] videocassettes in VHS, Beta, and U-Matic formats depicting the activities of the Human Resource Modernization and Compensation Task Force. The replication effort of this 27 minute tape was completed on January 30, with the tapes available for dissemination that day. [REDACTED]

25X1

E. In an effort to eliminate misunderstandings concerning data transmission and how it relates to our Computer Output Microfilm (COM) and vugraph output, representatives of the Office of Logistics, Printing and Photography Division (OL/P&PD) met with a representative of the Office of Information Technology (OIT) to discuss this matter. A long held belief that a fiber optic communication link between the Headquarters building and the Printing and Photography building would be the only means by which graphic data could be transmitted in a timely manner was determined to be incorrect. The existing link which was upgraded in 1984, is able to transmit at the rates necessary for our equipment. It was further determined that delays attributed to transmission distance should actually be blamed on the inability of existing equipment to receive the data fast enough. When a fiber-optic communication link is installed, it will not increase the capabilities of the link, but will make the system more efficient. Fiber optics should be installed within 2 years. [REDACTED]

25X1

C O N F I D E N T I A L

III. Significant Events Anticipated During the Coming Week:

Diacomed Briefing: Beginning at 1300 hours on Monday, 9 February 1987, several representatives from Dicomedia, Inc. will brief Office of Logistics, Printing and Photography Division (OL/P&PD) personnel on specific costs and system integration requirements for the incorporation of a Dicomed "File Manager" into P&PD's computer graphics system. The addition of the File Manager is part of an ongoing P&PD effort to enhance its computer graphics equipment to meet increasing Agency demands for high quality graphic products. The File Manager will place P&PD equipment on-line with the Agency's VM mainframe which will give Agency mainframe users direct electronic access to P&PD graphic design personnel and film recorders. The net result will be a reduction in the turn-around time required for P&PD generated graphics. It is anticipated that the File Manager will be fully operational by the end of FY-1987.

25X1

IV. Management Activities and Concerns:

None.

25X1

25X1
25X1

25X1

25X1

C. Two Supply Officers were TDY [redacted] 27-29
January for orientation briefings and discussions of a number
of on-going logistics details. [redacted]

25X1
25X1
25X1

[redacted]

25X1

E. Personnel from Operations Support Branch and Supply
Management Branch, Supply Division, have designed, loaded and
put into operation a visual memory drawer to manage MLS
assignments. This tracking system provides the Chief and
Deputy Chiefs of Supply Division immediate access to all
information concerned with current personnel assignments and
vacancies as well as work sheets for each action requiring
attention during personnel meetings. [redacted]

25X1
25X1

F. The Chief, Supply Division is TDY to the [redacted]
Logistics Conference [redacted]

25X1
25X1

[redacted]

25X1

3
S E C R E T

25X1

J. Current maintenance provisions of the Inventory Control System (ICS) do not allow a deletion of a warehouse location unless a new location is input simultaneously with the location to be deleted. An RFC has been submitted to permit a deletion of a location without having a new one at the same time. Since we were unaware that deletions were not being accomplished as they were being submitted after each inventory, I&AS personnel will now begin reviewing locations of those items inventoried in December and will identify those that still require deletion action. Chief, Data Management Branch, Supply Division, will accomplish these deletions by using certain maintenance functions (MRS) not normally available to ICS users. [redacted]

25X1

25X1

25X1

O. Data Control Branch, Supply Division, has generated several reports for Small Purchases Branch. These reports provide a count of line items and total dollar value for each month of FY 85. [redacted]

25X1

P. Data Control Branch, Supply Division, has been unable to process any floppy disks [redacted] because a wrong country code had been input into the disk. The problem has been researched and the necessary steps are being taken to correct the problem. [redacted]

25X1

h. Preventive Maintenance Schedule on the Air Handlers and Chillers at the Ames Building - On 28 January 1987, representatives from the Real Estate and Construction Division, General Services Administration and Dominion Management (Ames Building Manager) inventoried all the special air handlers and chillers in the Ames Building. This information will be used to prepare a preventive maintenance contract. [REDACTED]

25X1
25X1

i. Failure of 50-Ton Chiller, Ames Building - On 28 January 1987 the Real Estate and Construction Division, OL received a report that the 50-ton chiller at the Ames Building was not functioning. As a result the computer equipment belonging to the Office of Research and Development went down. The chiller was found to be shutting off due to a high freestat setting which was corrected through an adjustment of the chilled water thermostat. [REDACTED]

LOGISTICS OPERATIONS CENTER WEEKLY REPORT
FOR PERIOD ENDING 31 JANUARY 1987

25X1

1. Progress Report on Tasks Assigned by Senior Management:

Internal construction work on Section 1, [REDACTED] 25X1
[REDACTED] continues at a fairly good pace despite the 25X1
weather. Dry wall work is approximately 85% complete and the
painters have started applying the first prime coat of paint. The
contractor has scheduled pouring of concrete for the vault walls for
the week of 2 February 1987. In view of the pace that the
construction activity is taking, we are still looking at a 1 April
1987 occupancy date. [REDACTED] 25X1

OL/NBPO WEEKLY REPORT - PERIOD ENDING 4 FEBRUARY 1987

1. Progress Reports on Tasks Assigned by the Senior Management:

None.

2. Major Events that Have Occurred During the Preceding Week:

a. A close examination of new gas turbine generator No. 7 has revealed that it has suffered serious damage to its compressor (jet engine). Compressor blades are chipped and cracked. The metal appears to be blue in color suggesting that the unit was subject to excessively high temperatures at some time. Since the unit has never been run at Headquarters, it appears the damage must have been sustained during testing at the Williams and Lane plant in California. Arrangements are being made to ship the compressor to a repair facility. Repairs may take up to four months. At the present time, units 2, 3, 4, and 5 are available for service. Preliminary testing of the Load Management System indicates that the programmed logic as it pertains to the operation of the 13.2KV switchgear is correct. Arrangements are being made to demonstrate this fact using a test board made up of lights representing circuit breakers. [REDACTED]

25X1

b. Due to the recent hazardous weather conditions, the rerouting of traffic at the George Washington Memorial Parkway (GWMP) entrance was delayed. The start of construction and the altering of traffic at the GWMP entrance was started after the 2 February 1987 morning rush hour. [REDACTED]

25X1

c. On 29 January 1987, the Bid Package 4 contractor reported that all recently paved areas on the Headquarters compound have been striped. [REDACTED]

25X1

d. On 28 January 1987, the New Building Project Office, OL, responded to a request from the Security Duty Office for a recent aerial photograph of the New Headquarters Building. The Physical Security Division, OS, in coordination with the Office of General Counsel (OGC) plans to release it to the Helicopter Pilots' Association (HPA) for inclusion in an upcoming story in their magazine. Both OS and OGC have been working with the Federal Aviation Administration (FAA) to limit overflights of the Headquarters compound by unauthorized aircraft. We understand that the HPA believes that publication of the article will encourage local helicopter pilots not to make their aircraft available for non-official overflights. [REDACTED]

25X1

e. The 20 five-inch, northside building-to-building conduits were cleaned by the New Headquarters Building (NHB) contractor on 30 January. Ford Aerospace inspected and measured these runs on 2 February. The NHB occupancy is keyed to completion of these building-to-building communications links. [redacted]

25X1
25X1

f. The Bid Package No. 3 contractor has substantially completed the new domestic water pumping station in the Headquarters Powerhouse. The new system will replace the original system and primarily consists of new ariable speed pumps with associated controls. This system serves the water tower and provides water to the Headquarters complex. The new system will be phased into operation during the month of February and a scheme was developed so that water service to the compound will not be affected. [redacted]

25X1

25X1

3. Upcoming Events:

The Office of Training and Education New Headquarters Building space briefing has been rescheduled for 18 February at the [redacted]

C/FMD/OL

~~CONFIDENTIAL~~
FACILITIES MANAGEMENT DIVISION
WEEKLY REPORT FOR PERIOD ENDING 4 FEBRUARY 1987

1. Status of Tasks Assigned by Senior Management:

a. Installation of an exhibit celebrating the Directorate of Science and Technology Silver Anniversary began on 1 February. Each office in the directorate is spending a day setting up and the first was NPIC. The Interior Design Staff is assisting the exhibitors and supervising the use of the Exhibit Hall property. [REDACTED]

25X1

2. Major Events That Have Occurred During the Preceding Week:

a. Architectural Design Branch has completed design drawings and specifications for modification to the main cafeteria. The new design will relieve the traffic congestion near the hot food serving lines. [REDACTED]

25X1

b. On 25 January at 0300 hours, the Emerson 60 Hz UPS in Room GE2803 Headquarters, went into bypass. The Allied duty electrician was called and placed the system back on-line. Module #2 was the cause of the problem and was left off-line. True Power from Richmond was notified and arrived on 27 January. The unit was repaired and the system was back to 100% normal operation at 1030 on 27 January. Cause was determined to be a blown output filter capacitor. [REDACTED]

25X1

c. Vincent Melzac and two officials from the Fort Wayne Museum of Contemporary Art visited the Agency on 29 January to review all the paintings lent by Melzac to the Agency. Melzac is trying to arrange a joint exhibit of "Washington Color School" painter's works to be shown in Fort Wayne, Sarasota and another city unnamed as yet. Included in the proposed show would be many of the paintings on loan at Headquarters. Additionally, Melzac has arranged to remove, for restoration, a large painting currently hanging in the Main Reception. This is advantageous for us since the area is about to undergo renovation. [REDACTED]

25X1

CONFIDENTIAL

25X1

f. Due to the weather conditions on 25 January and 26 January, the Snow Emergency Center of FMD put Plan A into effect for the Motor Pool. One dispatcher and two chauffeurs were called in for standby duty. Later that evening as bad weather continued, the Chief Dispatcher was requested to call in more people. Fourteen (14) calls were made for drivers. A total of 91 hours of overtime was spent. [REDACTED]

25X1

g. During the 24-hour period starting at 2400 hours on 25 January through 26 January, a total of 164 hours of overtime was spent in support of various tasks. Even though the Government offices were closed on 26 January, the Motor Pool Branch still had a total of 21 people working during that time in support of the Snow Emergency Plan A. [REDACTED]

25X1

h. On the morning of 27 January, the DDA and DDO and their secretaries were picked up from their residences and transported to work. In addition, two briefers were transported from their Northern Virginia residences to Headquarters, from Headquarters to their daily assignments, and returned to the Agency. All requirements were handled by four-wheel drive vehicles. [REDACTED]

25X1

i. The Maintenance Section of the Motor Pool Branch, in support of Allied Maintenance, made repairs on seven pieces of snow equipment. A total of 192.5 manhours was used for the two days of snow emergency, of which 128.5 was overtime. [REDACTED]

25X1

3. Upcoming Week:

a. The training session for the MG careerists was conducted by the OP/Retirement Task Force on 30 January. The personal computers were removed from 1A07 and stored by Building Services pending the demonstration scheduled for 3-5 February in the 1J corridor. [REDACTED]

25X1

b. The Passenger Vehicle Section of the Motor Pool will transport 626 passengers during the coming week. [REDACTED]

25X1
25X1

c. There will be a partial steam outage in the North Penthouse and North Basement on Saturday, 7 February from 0600 to 1400 hours. The outage is to replace the condensate piping. If the outdoor temperature is below 40 degrees, the outage will be rescheduled. [REDACTED]

25X1

d. Design Branch has submitted design drawings and specifications for the DCI Security Staff for review and approval for the creation of a two-man office in the DCI's garage next to the visitor's lounge. [REDACTED]

25X1

4. Management Activities and Concerns:

a. The Parking Office/FMD wishes to express its appreciation to all Agency employees for their cooperation during the past week while "open parking" was a necessity in order to park all the vehicles. Some inconvenience will continue until all the snow can be removed from the West "A" lot. Please be aware that the VIP, Northeast/Northwest entrances, Southwest entrance, and the four Visitor Handicapped spaces in the North "A" row are RESERVED 24 HOURS A DAY.

25X1

b. On 17 February, a new employee will EOD for the Mail and Courier Branch. [REDACTED] will enter on duty as an internal courier. With [REDACTED] coming on board, the Mail & Courier Branch will soon be releasing [REDACTED] to the Office of Information Resources/DDI.

WEEKLY REPORT FOR PROCUREMENT DIVISION

FOR PERIOD ENDING

03 FEBRUARY 1987

1. Progress Report of Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

a. The Procurement Division, Office of Logistics, concluded negotiations and definitized a letter contract with Booz, Allen & Hamilton, Incorporated, for technical services to supply the software engineering and quality assurance expertise needed to perform the implementation of major enhancements, support, and quality assurance for the Multilateral Counterterrorism Database Systems Program as required by the Office of Information Technology. The contract was negotiated in the total amount of \$370,559.

25X1

b. The Procurement Division, Office of Logistics, completed negotiations with IBM, Gaithersburg, MD, for FY87 continued support of Applications Development for the Office of Current Production and Analytic Support, Directorate of Intelligence. A savings of 12,000 was realized resulting in a contract for \$288,906.

25X1

25X1

S E C R E T

d. Procurement Division, Office of Logistics, awarded a firm-fixed price contract in the amount of \$66,000 to Levinson Institute of Cambridge, Massachusetts. This contract is in support of a requirement from the Office of Training and Education for the continuation of the Agency's Executive Leadership Program. The contractor will conduct two five day seminars entitled "... On Leadership." The courses are scheduled to be completed by 12 June 1987. [REDACTED]

25X1

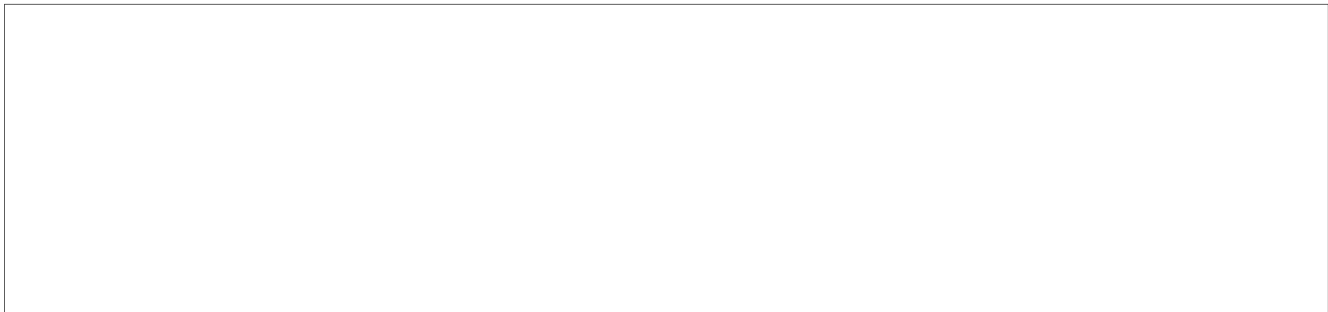

25X1

g. Procurement Division, Office of Logistics, awarded a contract to MEMOREX Corporation in the amount of \$629,640 for the annual supply of magnetic cartridge tapes and EDP tapes. Seven contractors offered proposals on the requirement. [REDACTED]

25X1

**INFORMATION AND MANAGEMENT SUPPORT STAFF
WEEKLY REPORT FOR PERIOD ENDING 03 FEBRUARY 1987**

1. Progress Report on Tasks Assigned by the DCI/DDCI:

Memorandum of Agreement (MOA): The MOA between OL, OIT and OF on the topic of Corporate Data, specifically CLAS, is now in the Front Office of OL for review.

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

A. DAS

(1) Representatives from General Electric (GE) visited with members of OL/DAS and TG to clarify requirements for downloading LADS III from a Wang VS-100 System to either an IBM PC or a smaller Wang VS System. GE plans to have a draft proposal outlining the scope of work for downloading LADS III ready by 6 Feb 87.

STAT

(3) General Electric Barcode Study is continuing on schedule. The GE team provided an interim briefing for Technical Group and DAS personnel on their progress within OL including some preliminary recommendation on ways to improve work flows. Additional status briefings are planned before a final report is submitted by GE.

B. Planning

(1) IMSS met with the Design and Presentation Center (D&PC) of P&PD to plan graphics for the upcoming OL Quarterly scheduled for 26 and 27 February. Graphics requirements for two of the five OL presentations were defined for D&PC, and preliminary plans for a third presentation were discussed. IMSS will continue meetings with the presenters and graphics personnel to coordinate briefing materials and scripts.

ADMINISTRATIVE - INTERNAL USE ONLY

WEEKLY REPORT FOR PERIOD ENDING 03 FEBRUARY 1987

(2) IMSS assisted the EO/OL in preparing an inventory of all Corry-Jamestown furniture in OL. The inventory, based on inputs received from OL divisions and staffs, was conducted at the request of the DDA Management Staff to assist them in preparing for a meeting with the Comptroller.

C. CLAS

(1) Functional Meetings: During the past week the CLAS teams, along with OIT technical personnel, met with Cullinet functional analysts to begin the implementation plans for package software. Tasks are being broken into subtasks, projected man-days to complete the tasks are being evaluated and tasking assignments are being made. Training schedules are also being devised.

(2) Other: Installation dates for Purchasing and Accounts Payable have been set for 17-20 February; tentatively, Inventory Control, Bill of Materials and Order Entry are being planned for early March.

D. Regulations

(1) IMSS initiated a follow-up meeting with responsible senior Agency managers relative to the new Agency no-smoking policy and to review the proposed wording of the Employee Bulletin and Hqs. Notice originated by the EXA/DDA. Selected areas were also chosen as recommended sites for the Agency Health and Safety Committee to consider as designated smoking areas. (The ADDA recently delegated to Dr. Arvel Tharp the Chairmanship of the Health and Safety Committee.) The goal of the managers meeting with the EXA/DDA was to present a viable no-smoking policy recommendation that the Deputy Directors could approve and implement by 8 February 1987. This subject will become a new Health and Safety Regulation when issued by RPD/OIS.

STAT

(2) OGC initiated a revised HQS Notice that explains the procedures to request support from DOD components thru the focal point system. IMSS suggested minor working clarification and recommended additional information naming C/IDSB/SD/OL as primary point of contact for initiation of all logistical support required from the DOD.

WEEKLY REPORT FOR PERIOD ENDING 03 FEBRUARY 1987

(3) Regulatory issuances reviewed and concurred by IMSS included:

25X1

c. EB 1464, Update on CIA Child Day Care Center

3. Significant Events Anticipated During the Coming Week

CLAS:

(1) Implementation Mtn: On Tuesday, Feb. 10, the CLAS teams will meet with Cullinet analysts to review the implementation planning completed at that time. The meeting will be held in 3G-06.

(2) Planning Session: The CLAS team members will be meeting at on 12 & 13 Feb. to finalize the CLAS portion of the Implementation Plan.

25X1

4. Perspective of Staff Activities

STAT

5 February 1987

MEMORANDUM FOR: Deputy Director for Administration

FROM:

[redacted]
Acting Director of Logistics

SUBJECT: Report of Significant Logistics Activities for
the Period Ending 4 February 1987 [redacted]

1. Events of Major Interest That Have Occurred During the
Preceding Week:

a. The New Building Project Office, OL, responded to a request from the Office of Security (OS) for an aerial photograph of the New Headquarters Building. OS, in coordination with the Office of General Counsel, plans to release it to the Helicopter Pilots' Association for inclusion in an upcoming story in their magazine.

25X1

b. OL reports that the Bid Package No. 2 contractor has begun installation of the terne metal in the first floor atrium area of the New Headquarters Building. It forms an important part of the RF shielding. The terrazzo flooring will be installed at a later date.

o. OL reports that a total of 602 hours of overtime were spent on 26 January and 586 hours of overtime were spent on 27 January in support of the Snow Emergency Plan. Even though the government offices were closed on 26 January, the Motor Pool Branch had a total of 21 people working. (U)

p. The production of the 13-volume Congressional Budget Justification Books (CBBJ) continues as a high priority task for OL. As of 2 February, five volumes (6, 8, 10, 11, and 13) have been completed and disseminated. All other volumes are in the production cycle with the exception of Volume 5, which is awaiting approval of page proofs. The processing of the CBBJ has been hindered this year due to the slow verification process by the customer. (U/AIUO)

q. OL completed the replication of 140 videocassettes in VHS, Beta, and U-Matic formats depicting the activities of the Human Resource Modernization and Compensation Task Force. The replication effort of this 27-minute tape was completed and made available for dissemination to Agency components. (U/AIUO)

r. OL concluded negotiations and definitized a letter contract with Booz, Allen & Hamilton, Inc., for technical services to supply the software engineering and quality assurance expertise needed for the Multilateral Counterterrorism Database Systems Program as required by the Office of Information Technology. The contract was negotiated in the total amount of \$370,559. (U)

s. Representatives from OL and the General Accounting Office (GAO), met on 3 February to discuss the Agency's experience in changing from a GSA-supported facility to a contractor-supported facility.

GAO is currently negotiating with GSA to take over responsibility of their building. The majority of GAO questions related to the size of OL's organization, experiences with the contractor, and the advantages of a fixed-price versus a cost-plus-award-fee contract.

At the conclusion of the meeting, a tour was given of the existing Headquarters Building with major emphasis on space occupied by the Allied shops. (U)

2. Significant Events Anticipated During the Coming Week:

An Office of Security representative will visit the on 11 February to discuss details of the replacement of Federal Protective Officers by Security Protective Officers at the Center. 25X1
